The Danny Weil story –by OH2BH

The Board of Directors of the Yasme Foundation is pleased to announce the release of "Danny Weil – A Dreamer of Distant Lands Who Took Amateur Radio on the Trip of a Lifetime" by Martti Laine, OH2BH, AH3D, VP2VB (re-issued). The 21-page article is published **here** — click on the "Danny Weil: DXer & Dreamer" menu entry. The page also contains a list of Danny Weil expeditions, a collection of Danny's QSLs, and an interview with Danny at age 80, with OE1WHC of Dokufunk. Along with OH2BH's article, the book Yasme: The Danny Weil and Colvin Radio Expeditions by James D. Cain, K1TN, is also now available for the first time as a free downloadable PDF.

VK100AF and VI100AF Royal Australian Air Force Centenary

After 7 weeks on air, both **VI100AF** & **VK100AF** continue to be very popular around the bands. Conditions have been poor, making it tough for the team but they have pushed on and successfully now have over 20k QSO's in the log. Tim M0URX has begun the task of sending out the Special Event QSL cards around the World. The QSL card can be viewed on QRZ.com.

KL7RRC Kiska Island NA-070 Alaska –update

After their Covid-related cancellation last year, the Russian Robinson Club (KL7RRC) has resumed plans to activate rare Kiska Island, IOTA NA-070 in July.

Located 52.06N, 177.57E, this uninhabited island lies in the North Pacific's treacherous Bering Sea, one of the most intense patches of ocean on Earth, where strong winds, freezing temperatures, and icy water are the "norm." This remote Island also features

the prominent conical, Kiska volcano, the westernmost historically active volcano in Alaska's Aleutian Island chain.

Kiska Island is also designated as an Aleutian Island WWII National Historic Area by the National Park Service. Permission to visit Kiska is required from both Alaska's Maritime National Wildlife Refuge and the US Fish and Wildlife Service.

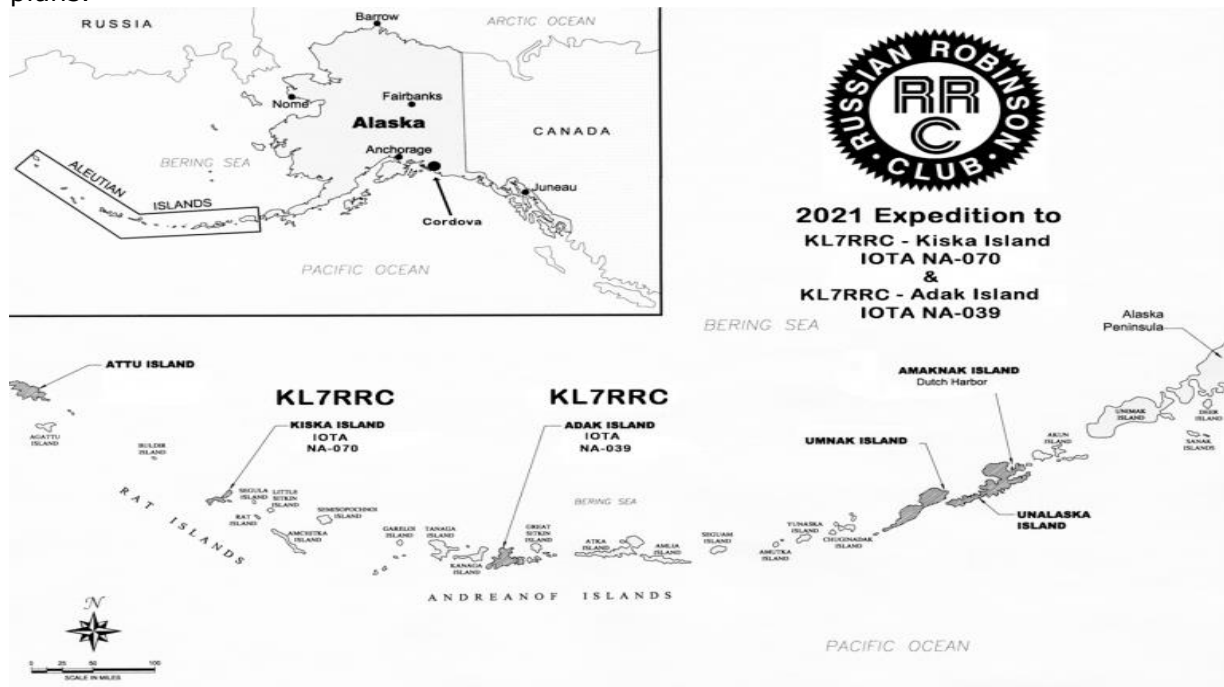

The KL7RRC team currently includes: Hal W8HC; Rob N7QT; Tim NL8F and Yuri, N3QQ. Unfortunately, another team member has had to back out so there is currently an open slot for a 5th operator. Contact team leader Yuri N3QQ kl7rrc@gmail.com if you may be interested.

The team plans to have a minimum of 2 stations QRV operating 40m through 6m, SSB, CW and FT8 with 1.2kw PAs. Special emphasis will be on the difficult trans-polar path to EU.

The 56-foot aluminum sailboat, "**SEAL**" is being chartered out of Cordova, AK. It will undertake the arduous 1,000 mile journey along the Aleutians to Kiska with first stop at Dutch Harbor, AK to pick up Tim NL8F and all of the gear sent in advance to his QTH. They will then continue sailing westward to Adak Island (NA-039) where the remainder of the team will have flown in to by July 3, board SV SEAL, and with favorable winds and seas, they hope to arrive at Kiska and be QRV as KL7RRC from July 7th – 12th before the return sail back to Adak and flights home booked for July 17th. Some members of the team will travel out to Adak a few days in advance of the scheduled July 3rd pick-up by SEAL and will be QRV from this rare IOTA entity. Look for KL7RRC from Adak, NA-039 June 30th – July 3rd. Likewise, there may be additional KL7RRC activity from Adak July 14th – 16th following their return from Kiska.

The budget for this IOTA DXpedition, excluding individual team member fares, lodging and meals at Adak, is ~\$40K, with \$30K required for the SV SEAL charter and two-way journey between Cordova and Kiska. Obviously, donations will be greatly appreciated in support of this challenging IOTA DXpedition. They can be sent via PayPal linked to the RRC [website](#) or via check and payable to: Russian Robinson Club and note "Donation for KL7RRC 2021 Expedition." Please mail to Yuri N3QQ via his QRZ.com mailing address. QSLs for KL7RRC (Kiska Island NA-070) and KL7RRC (Adak Island NA-039) via N7RO. ALL donors will receive direct QSLs.

Continue to check or bookmark the RRC [website](#) for updates and additional operating plans.

Russian District Award

<http://rdaward.org/indexeng.htm>

Our diploma program has been around for 20 years, and its main goal is to get cfm for QSO with all districts of Russia.

We have developed an automatic RDA district cfm specifically for fulfilling the requirements of the diploma program:

<https://mydx.eu>

This service makes the participation as easy as possible. You do not need to create an application and send it to the Diploma Manager – all you need to do is to send in your payment and your post address. You can get either one or several diplomas – it is up to you. For your convenience we have created special version of RDA dx-cluster where you can easily see those RDA-s that you don't have confirmed yet.

You also have a possibility to have a sound notification when your unconfirmed RDA is spotted. Go and check it out:
